

TU80

81P compatible
composite staples
and associated tooling

The Titac TU80 staples share many of the advantages of Titac original staples while being compatible with 81P stapling tools. You get the same low wear on cutting tools, the same non-conductivity, the same resistance to chemicals and you can keep using your existing tools. The TITAC TU80 staple strip is longer than most other plastic 81P strips on the market – more staples, fewer reloads. Work more efficiently!

The TU80 staples comes in two levels of hardness, extensively tested to perform well in different kinds of woods.

Soft

For woods such as spruce, pine, alder and cedar.

Hard

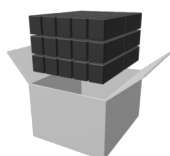

For harder woods such as birch, maple, beech or plywood.

TU80-10	TU80-10 Soft	quantity 1500	art.nr. 15019	quantity 6 000	art.nr. 15020
	TU80-10 Hard	1500	15021	6 000	15022

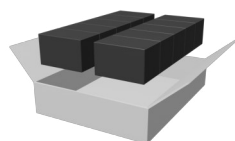

The default colour is white. Other colours can be made on request.

Packaging

The TU80 staples are packaged in two sizes, one small box for easy carrying and one larger economy pack.
